Inspiring Future

At MADE EASY SCHOOL, we believe that a 21st century student requires more skills than just an academic purview. With this objective, we have partnered with three effective programmes:

- MindBox aims to build Functional Literacy in students and empowers them with the advanced and additional skills. We use the STREAM (Science, Technology, Research, Engineering, Art, and Mathematics) framework as an interdisciplinary and experiential learning approach to teach:
 - Design and Creative Thinking as a Subject.
 - Visual Communication as a Language.
 - Technology as a Tool.
- SHIN EDU POWER, a Japanese based educational group highlights the following in their programme:
 - Unique group learning methodologies related to Mathematics, which develop multiple abilities such as cognitive, retention, creativity, imagination etc.
 - Customized educational solutions for enhancing soft skills and academics that is based on the belief that education has the power to create opportunities for people and countries
- Cubetto, a friendly wooden robot that helps your child with the basics of computer coding

Awards

Goals for life

Our Shubh Velas, unique to our school, aim to help young learners discover the joy of experiential learning. It is intricately designed to give them an intertwined sense of freedom and control.

- The DEAR session consists of getting the whole school to stop, drop what they are doing and to read. It aims at inculcating good reading habits, improving grammar and vocabulary, developing creativity and critical thinking.
- The 'Happiness Curriculum' focuses on activity-based learning, value education and mental exercises. This curriculum is aimed to stimulate good mental health, character and resilience.
- Project Based Learning enables and equips students to explore higher order thinking skills along with connecting to the real world experiences that help them to create workable solutions.
- y)
A practice where a child connects to the environment emotionally, understands the existence and importance of nature in their lives. They also understand the coexistence of species and learn to respect the same.

Societal Elevation via Action

Our Responsibilities

- The SANSKAR GARDEN is our commitment to preserve the rich biodiversity of our planet —The Earth. Through a unique and singular initiative, all students of MADE EASY SCHOOL plant a sapling on their first birthday at school and nurture it throughout their academic journey with us. This initiative shall always bear testimony to this wonderful association between the child and nature. Sanskar Garden is our small way of promoting environmental awareness and saying 'Thank You' to Mother Nature.
- The learners of our school led several campaigns such as, Save Water, Save Trees, Save the Tigers. The objective was to create awareness amongst the learners through creative and engaging activities about the environment, flora and fauna and the need to maintain a delicate balance to save the planet for

Rights vs Duties

As a part of our community outreach programme and to educate students about their social responsibility to their immediate community, the students are empowered in several ways:

- The students and teachers collected and donated books to the less privileged children of Anganwadi, Bandhwari.
- A visit was organized for our students to a nearby Anganwadi during Diwali. They helped the little children create different crafts to decorate their Anganwadi and celebrated the festival of lights with a lot of fervour, joy and other enjoyable activities.
- Some of our students also took their sense of duty and social responsibility to the next level, when they visited EPOCH — an old age home. They spent a very satisfying day bonding with elderly people, greeting them with roses, performing a Goan dance and spending time with them.

Active Citizenship

It is important to create awareness and empower little minds early on to make informed decisions or to influence the decisions in matters that affect one's community and environment in a positive way.

One of the initiatives supported by the school in this regard is the Samadhan Hub, an endeavour by the NGO 'I Am Gurgaon'. To create active participation and engagement towards environmental awareness and protection, the students collected waste from the surroundings and segregated it as recyclable plastic, construction waste, polybag waste, and non recyclable waste - thus learning by doing.

At school, the students are also continuously sensitized towards the colossal damage being caused by waste littered all around. These young beacons are ambassadors of change pledging to spread the message of saying NO to the use

Change Advocacy

The school also designs and supports initiatives that instills in the child accountability, clarity of purpose and a sense of moral responsibility towards social and environmental causes.

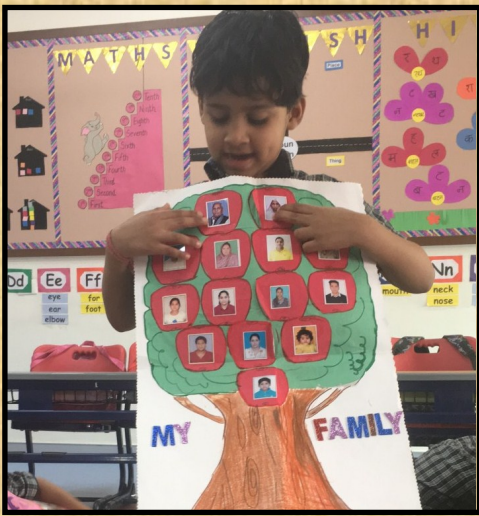

Students of our school joined hands to reach out to the community and persuade for the cause of 'Water' - the elixir of life.

The District Administration of Gurgaon chose the students of Made Easy School to show case by way of a Nukkad Natak, the thin line we are treading on. The event held on 19th July 2019 in John Hall Civil Lines was marked by the launch of the district administration's website and helpline - 'Gurujaal' (under the Jal Shakti Abhiyan launched by the Hon'ble PM).
