

Dear Parents,

27th May 2020

These are unprecedented times, making it more important to understand the world around us as well as build the skills that will be important to the students. To make sure our students are Future Ready, we are introducing you to the **AugLi Skills Program**. This will help the students to hone their digital literacy, communication skills and improve critical thinking.

Being an intuitive app, the students will find it easy to onboard. They only need to login on AugLi to explore the gamified skills-based app.

Brief about the AugLi Skills Program

Augmented Learning (AugLi) is an engaging AI application that hones digital literacy, communication and critical thinking skills in a personalised way. AugLi enables children to be more aware, have a point of view and express themselves better. Students are given daily activities to practice strengthening their skills (SuperPowers) to have meaningful conversations. AugLi then gives real-time feedback on their clarity, speaking pace, grammar and use of rich vocabulary - all in seconds.

Benefits for the Learner

- Personalised articles are displayed basis a student's interest
- Adaptive content - aligned to student's current reading level
- Live current affairs every day to build awareness
- Real-Time feedback on communication and thinking skills
- Visibility to action areas & tracking to ensure improvements
- Gamification with Superpowers that allows students to master levels
- Regular updates to parents, sharing the child's progress and action areas

Outcomes

- Improved Communication skills with ongoing language & vocabulary practice
- Build knowledge and awareness, introducing fresh points of view
- Stimulates Critical Thinking (CT) by strengthening the ability to identify key points

How to Login to the AugLi App:

a) Students need to download the Android App using the link - <http://bit.ly/augli> or scan

b) Once the student logs in, **the App** will customize the interest areas content to the students reading level.

c) Use the Access Code – PA15KK

In case of any query regarding AugLi mail at hello@augli.ai.

Hope this would be a great learning experience for students.

Regards

Ms. Pramugdha Kataria
Academic Coordinator
