

## What children need to truly learn

The world today has more knowledge than ever before. People across the globe have understood that education means more than getting enrolled in a school. It has to be relevant and sustainable; a force multiplier which enables self-reliance, boosts economic growth by enhancing skills, and improves children's lives by opening up opportunities for better livelihoods — the reason why UNESCO has come up with Educational Sustainable Development Goal (SDG) 4.

Keeping in view UN's SDGs, **MADE EASY** — a renowned name in the field of competitive examination, has forayed into school education with **MADE EASY SCHOOL**, at

Bandhwari, Sector 59, Gurgaon.

The school's enquiry-based learning environment instills a sense of sustainability and responsibility in children. With a green, innovatively designed campus dedicated to open spaces that are specially designed keeping in mind optimum natural light and cross-ventilation, the school helps children discover a way of living that is whole, sane and intelligent, nurturing sensitivity to nature and compassion in them.

This is bolstered by plantation drives that protect, restore and promote terrestrial ecosystem, and organic farming that ensures children learn to grow their own food, develop healthy

eating habits and achieve overall well-being. A special space called Sanskar Garden has been designed in the school where tree saplings of native species are planted by students and staff which will grow to provide a forest cover and a canopy to cover the campus.

Completely environment-friendly, the school has its own STP (sewage treatment plant), where water is recycled and reused. It also has systems for rainwater harvesting, solar power plants and energy conservation units for affordable, clean energy, and sustainable consumption.

Spread across a campus of 25 acres, the school offers admissions from nursery to standard 6th, with exclusive benefits only

The school has a special place where tree saplings of native species are planted by students

for the foundation batch for the year 2018-19. Interested parents can visit [www.madeeasyschool.in](http://www.madeeasyschool.in) or contact the Admissions

Department at 8800882440/5424 for more details and a school tour. email: [info@madeeasyschool.in](mailto:info@madeeasyschool.in).
